SUMMARY

Software Developer with 3.8 years of experience building scalable enterprise applications using Spring Boot, Microservices & Java. Proficient in backend development, RESTful APIs, MySQL, MongoDB, Hibernate/JPA, OOP, & DSA. Experienced in Git, GitHub, Jenkins (CI/CD), Agile, & AWS Lightsail, with a focus on performance, security, & maintainability.

WORK EXPERIENCE

Software Developer

ADILA IT Consultancy Services Pvt Ltd

Jan 2023 – Mar 2026 Ranchi, Jharkhand

- Developed applications using Java, Spring Boot, and Microservices.
- Designed REST APIs and implemented scalable backend solutions.
- Implemented CRUD operations and managed data persistence.
- Ensured optimal database performance & enhanced application security.
- Collaborated with cross-functional teams using Agile methodology.

Software Developer

NR Switch N Radio Services Ltd

May 2022 – Dec 2022 Ranchi, Jharkhand

- Developed new features and debugged legacy code.
- Resolved system issues and provided technical support.
- Applied OOP principles and DSA to design and implement efficient, scalable backend solutions.

Operation Support

Bajaj Allianz Staffing Solutions Ltd

Jan 2021 – May 2022 Ranchi, Jharkhand

Trainee

ADILA IT Consultancy Services Pvt. Ltd

Dec 2019 – Dec 2020 Ranchi, Jharkhand

SKILLS

Core Java | Spring Boot | Microservices | Maven | JPA | MySQL | Hibernate | Kafka | MongoDB | OPP (Object-Oriented Programming) | Spring AI | Spring MVC | Docker | AWS | RabbitMQ | Jira | JUnit | CloudFlare | Postman | GitHub | CI/CD | Jenkins | WinSCP | MobaXterm | ReactJS | Vite

ACHIEVEMENTS

- LeetCode-70 GeeksforGeeks-10 Acciojob-369
- AIR 29803 CodeKaze-Jun'23 by Coding Ninjas.
- Java Certificate by CareerNinja | LearnTube.

EDUCATION

B.Tech in Electronics & Communication Engg

Maryland Institute of Technology and Management, Jamshedpur, Jharkhand

August 2016 - September 2019

Diploma in Electronics & Communication Engineering

KK Polytechnic, Dhanbad, Jharkhand

August 2012 - September 2015

PROJECTS

Crowdfunding Platform

Java | Spring Boot | Microservices | MySQL | React

Client: Sp Edumind Pvt Ltd

Designed and developed RESTful APIs using Java, Spring Boot, and Microservices architecture. Implemented role-based authentication and authorization for NGOs, hospitals, and volunteers, and built core modules for case management, fundraising workflows, and user onboarding. Integrated MongoDB and MySQL for efficient data handling, ensured application security through secure authentication mechanisms, and collaborated with cross-functional teams in an Agile environment.

Recruitment Web Portal

Java | Spring Boot | MySQL | MongoDB | Microservices

Client: Internal Product

Developed an AI-driven recruitment platform that automates candidate shortlisting by extracting CV data and matching it with job descriptions. Built backend services using Spring Boot and frontend using ReactJS, integrated AI tools for CV parsing, and implemented data storage using MongoDB, MySQL, and a vector database for efficient search and similarity matching, ensuring scalability for production-ready workflows.

MRR Web Application

Java | Spring Boot | MySQL

Client: Jharkhand Government

Contributed to the development of the MRR (Modern Record Room) system for the Jharkhand Government, enabling efficient retrieval of historical land records. Implemented new features, built secure login with SHA-512 encryption, and developed Spring Boot APIs for scalable and efficient data management.
